Beside Your Power

TKS Machinery; is a company that aim to give you advice and solutions to the axle and gear-boxes of construction machinery and all earth equipments, arising from the experience of its founders.

We know that the supply of spare parts for your machines goes beyond just a commercial process because it also requires technical knowledge, parts identification, speed and efficiency. In the machine world, there are many companies where you can change a specific part in the shortest possible time and cost. For this reason, our team of experts will work hard to give you a service that exceeds your expectations.

However, identifying the right equipment, ensuring high quality and guarantee are just a few of the other possibilities we offer. As TKS family; With over 30 years of experience and more than 4000 types of spare parts ready for sale, we offer reliable service for all your needs with competitive prices, high quality and durable products, guarantee and post-purchase support, international shipping facilities. For this purpose, we are ready to serve you with our sales, service-maintenance and production departments.
